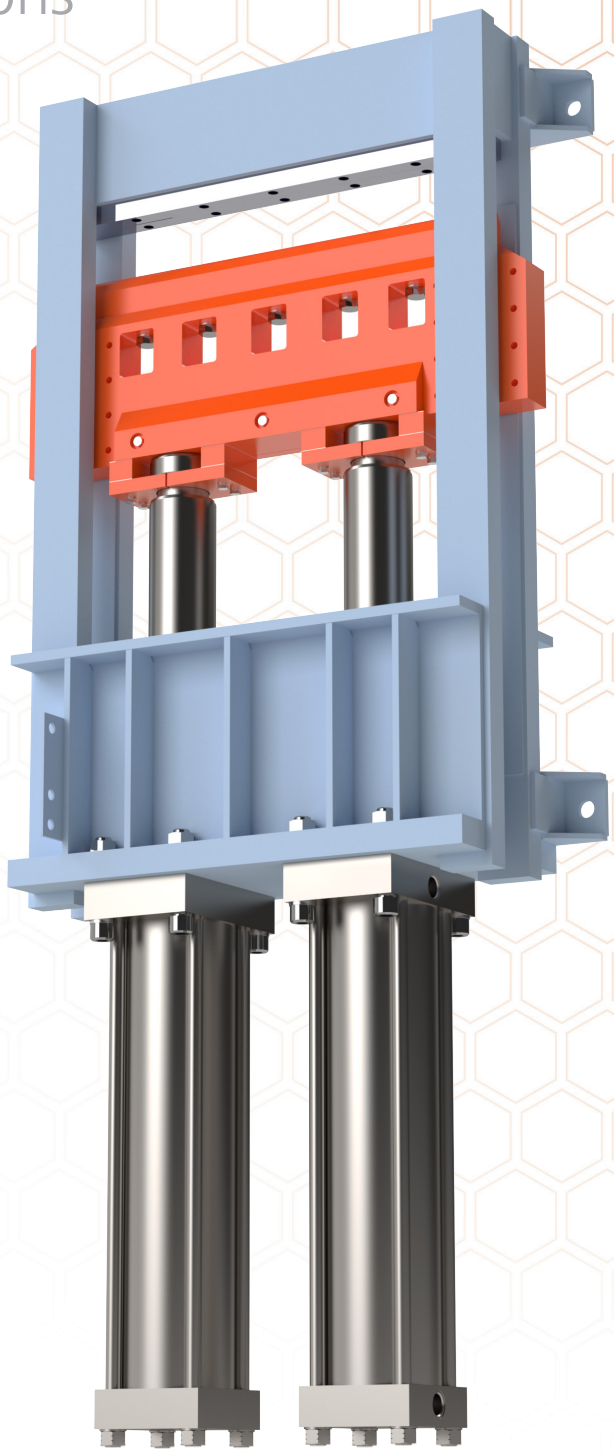
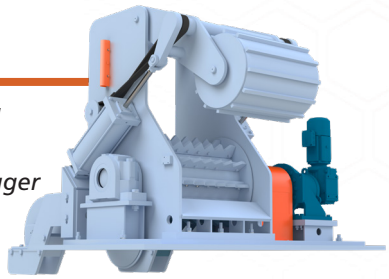
Rag Tail Cutter

Clean cuts ragger debris tail for easy disposal





Perfectly suited for use with the Kadant Ragger

Rag Tail Cutter

The Rag Rope Cutter

A continuous rag-tail rope is formed by the action in the pulper tub. To aid in the disposal of the rope, the Ragger can be used with a hydraulic rag tail cutter with a 30-inch square opening. The cutter is used to chop the rope into shorter sections for easier disposal. The cutter is a double cylinder guillotine design with a replaceable hardened steel knife blade and anvil. It is furnished complete with a hydraulic system that includes a 15 HP motor and pump capable of developing 3000 PSI pressure

Benefits

Safety in mind

- Provides safe, convenient method of rag rope length control for easier handling and disposal

Heavy-duty construction

- Rugged and compact design
- Double acting 7 inch hydraulic cylinders provide high cutting power
- 30 inch square opening enables cutting larger ragger tails

Low Maintenance

- Replaceable cutter knife for easy maintenance and reversible anvil for longer wear life

Removes large debris during the first stage of the pulping process.
